

Frida Persson

Full Stack Developer - Nie: Y0372328H

A stress-tolerant multilingual Swede who now has become a full-stack developer, and looking for that opportunity to learn and get out of my comfort zone. Preferably I would love to find a working environment where I can be challenged. I consider myself a dreamer and love to use this in my problem-solving skills. Being very goal-oriented I do believe there are various ways to improve and find interesting solutions to any issue.
